Announcements

- Check your emails for WiCyS Conference communications
 - Potential emails from recruiters -> resumes from conference applications got distributed

Getting an Interview

- Job postings
 - LinkedIn <- personal favorite
 - Career Fair (RIT, RITSEC, WiCyS)
 - WiCyS Job Board
- Connections <- not necessary, but helpful

Staying on Task

- Track every application
- Make note of which stage you're at

The image shows a digital interface for managing job applications. On the left, a sidebar titled "Job Applications" lists various companies with their current application status. On the right, the main area displays a specific application for "Jump Trading" with its sub-tasks.

Job Applications

- Amazon 1/1
- Epic Games 2/2
- Salesforce 1/1
- Microsoft 1/1
- Bloomberg 1/1
- Carnegie Mellon 1/1
- Meta 1/1
- IBM X-Force Red 1/1
- Jump Trading 2/2
- Blizzard 0/1

Jump Trading

Due date

Priority Label Reminders Description

Sub-tasks 2/2

- + Add sub-task
- Had initial talk with recruiter
- Applied

Professional Conduct

- Respond to requests for interview within 2 days
 - If it's big tech I'd do same day
- Email signatures ->

Sincerely,

Ashley R. Nikirk

I have the Interview!!!

Now what?

Research Phase

- **Reach out to previous people that worked at that company / current employees**
 - Alumni, RITSEC members, WiCyS, etc.
- **Document the job description**
 - Helps in preparing for the interview

Phone Screening

- First part of the interview phase
 - It serves as a baseline for the recruiter
 - Simple questions, 15-30 min
 - Basic qualifications
 - Will explain what the job is

Behavioral Interview

- Purpose is to identify how you respond to certain common workplace scenarios
 - When is a time you experienced conflict during a group project, and what did you do?
- Come prepared with good examples

Technical Interview

- Heavily dependent on the actual job
 - Some won't have a technical
 - Best way to prep is ask other people that went through the process for that company

Technical Interview

- HackerRank / LeetCode for SWEN roles
- For security it's generally scenario based
 - Given circumstance _x_ what would you do to protect the system or attack it

Mock Interview

- **Simulates an actual interview**
 - **One person takes the role of the interviewer**
 - **Other becomes the interviewee**
- **Extremely helpful in showing you what you need to improve and preparing general responses**

Mock Interview Workshop!
